Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 39-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Padgett et al. (US 5,570,743).

Padgett discloses a method that includes a method that includes a method of preparing a cement composition comprising the steps of: mixing a first cementitious component (fly ash and/or dry cement) and an aqueous-based fluid (water) to form an intermediate cement composition in a first mixer 2; and mixing the intermediate cement composition and a second cementitious component (fly ash and/or dry cement) in a second mixer 4 to form the cement composition. With respect to the depending claims, the reference teaches the limitations as claimed including monitoring properties (at least densities) of the intermediate composition, monitoring properties (at least densities) of the cement composition, and the first component is a fly ash. See particularly Figs. 1 and 2.

Allowable Subject Matter

3. Claims 1-38 are allowed.

Response to Arguments

4. Applicant's arguments filed 2/1/07 have been fully considered but they are not persuasive. Applicant argues that "Padgett does not teach 'mixing the intermediate cement composition and a second cementitious component in a second mixer to form the cement composition,' as recited in claim 39," which is respectfully traversed. Padgett teaches that although all the flows are shown in Fig. 1 leading into the first mixer, one or more of them (dry cement 6, additives 8/12, or fluids 10) can be fed directly to the second mixer (see col. 5, lines 65-67). Since any one of the streams of essential matter may go directly to the second mixer, the first mixer contains an intermediate mixture, which when combined with the at least third flow stream to the second mixture forms the *cement composition*. See also col. 6, lines 21-24 and lines 47-61.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
